connected by a glazed door. Large window display areas either side of the canopied entrance bring in plenty of natural light to the full depth of the property. A fine continual balustrade staircase provides access to each level of the property.

The basement level is currently used as a photography studio and sewing room, and benefits from a height of 2.38m. There is an additional WC and storage area on this level.

The first floor provides secondary retail space through two interconnecting rooms, and mirrors the Regency style of the rest of the building with sash windows and detailed architrave.

The second floor provides one supplementary room currently used for storage and as a working area.

There is a full-sized kitchen and single WC located on this level which is for the use of the third floor residential occupier. The accommodation on third floor level is flexible and could accommodate two bedrooms or a bedroom and study/small living area, the main bathroom can also be found on this level. The property benefits from gas central heating to all levels

except the basement which is currently using electric heating.

A planning application was obtained in 2014 giving consent for the property to be split for the purposes of multiple occupiers who require a physical separation. More details can be provided upon request.
